

Mykola Rudnev

Front-End Developer

I'm a front-end developer specializing in TypeScript, React.js, and Magento 2, with experience since 2020. I focus on building responsive websites and e-commerce platforms.

Work Experience

Javascript Developer, For Better Future Software House, Lublin

September 2020 - Present

E-Commerce Development (18 Online Stores) 01/2020 - Present

- Working on 18 e-commerce sites to add features, improve performance, and sometimes build entire stores using XML, jQuery, Docker, Less, Sass, and JavaScript, as an outsourced developer for Cloudflight. I've worked on 8 projects within **Cloudflight** during this time.

Recruitment Website 01/2023 - 12/2023

- Working on a job application website with TypeScript and Gatsby.js, focusing on a responsive interface, enhanced job listing filter, and client satisfaction.

Company Website for PVC 08/2022 - 01/2023

- Working on a responsive site for a PVC window company with WordPress, TypeScript, and Gatsby.js, adding dynamic content to meet client needs.

IT Company Website 09/2021 - 12/2022

- Working on an IT company's site using TypeScript, React.js, and styled-components, following atomic design to make it scalable and modular.

Recruitment Page Development 09/2020 - 04/2023

- Working on a recruitment page initially with React.js, then migrating it to Next.js for better performance and scalability.

Frontend Developer, ORBA, Lublin

January 2020 - April 2020

Worked as a junior front-end developer on an e-commerce website for the cosmetics industry, specializing in Magento 2. Focused on using key Magento 2 capabilities to improve site performance and user experience.
