

Mykola Rudnev, Senior Frontend Developer | React | Next.js | TypeScript | Product UI

Poland (Remote, EU timezone) , 790240418, rudnevmykola@gmail.com

Career Objective

Senior Frontend Developer with 6+ years of experience focused on **React**, **Next.js**, and **TypeScript**, delivering scalable web applications and production-ready e-commerce platforms. Works across product **UI**, **frontend architecture**, **performance**, and **SEO**. Experienced in building complex systems from scratch and improving existing platforms with measurable impact. Also brings commercial **e-commerce** experience (**Magento/Hyvä**, **Shopify**), adding real-world understanding of performance, conversion, and customer flows.

AI-augmented development: faster planning, refactoring, and validation with full ownership of architecture and production quality.

Core Skills

Primary: React, Next.js, TypeScript

Secondary: Magento 2, Hyvä Theme, Hyvä CMS, XML/Layout, PHTML

Architecture: SSR, ISR, SSG, code splitting, performance optimization

UI: component systems, reusable UI, responsive design

Styling: Tailwind CSS, Styled Components, LESS/SASS

Data: REST API, GraphQL

Practices: Core Web Vitals, SEO, accessibility

Work Experience

Jun 2026 - Present	Lead Front-End Developer - Magento 2 / Hyvä, HUBER SE	Self-employed / Remote, Germany
	Direct client e-commerce platform	
	• Leading frontend delivery for customer-facing e-commerce platforms • Acting as the main frontend contact for the client and supporting technical decision-making • Translating business, SEO, and marketing requirements into clear frontend tasks • Building reusable UI components, CMS-driven page structures, and multi-store frontend improvements • Implementing features across product pages, category pages, cart, checkout, customer account, and promotional content • Improving UX consistency, frontend performance, Core Web Vitals, accessibility, SEO, and maintainability • Coordinating frontend work with backend developers, SEO, marketing, and client-side stakeholders	
Jan 2026 - Jun 2026	Senior Front-End Developer , Lufed IT	Remote
	Product platforms	
	• Leading frontend architecture and delivery in e-commerce environment • Building scalable UI components and CMS-driven solutions • Improving performance, UX, and Core Web Vitals • Collaborating directly with stakeholders and SEO teams	

Sep 2020 - Feb 2026 Senior front-end developer, For Better Future Software House

Remote

Product platforms / React / Next.js

- Led development and delivery of multiple production web applications across e-commerce, marketplace, recruitment, and platform domains
- Built scalable frontend architecture and reusable UI systems using React, Next.js, and TypeScript
- Worked in multi-project environment, balancing feature delivery, refactoring, and performance improvements
- Delivered end-to-end frontend solutions from requirements to production in collaboration with clients and cross-functional teams
- Focused on performance optimization (Core Web Vitals), SEO, and UX improvements across all projects

Tech Stack: React, Next.js, TypeScript, Gatsby, REST API, GraphQL, Tailwind, Styled Components

Key React.js / Next.js Projects:

- ponadczasowi.pl — Built Next.js e-commerce platform (checkout, payments, shipping, blog), improved performance and mobile UX (lazy loading, code splitting)
- copernicspace.com — Developed NFT marketplace from scratch, implemented builder, listings, profiles, and optimized performance
- hrk.pl — Built recruitment platform (Gatsby + TypeScript), improved SEO and increased organic traffic by 50%
- pmicareers.pl — Migrated React app to Next.js, improved performance and scalability, built and maintained full frontend
- learningspace.app — Built educational platform with scalable UI and interactive UX using React and Next.js
- carneoo.de — Improved platform with new features, bug fixes, and custom components, enhanced UX and stability

Jul 2022 - Oct 2024 Front-End Developer, Cloudflight

Supporting E-commerce / Frontend Delivery Experience:

- Worked on multiple large-scale e-commerce storefronts across different industries, delivering full frontend features including product pages, checkout flows, and CMS-driven content
- Built and extended complex UI components, improving performance, UX, and overall platform stability
- Collaborated in cross-functional teams (developers, QA, product) delivering production-ready features
- Contributed to performance optimization, frontend architecture improvements, and scalable UI patterns

Key Projects:

British American Tobacco (4 stores) — Product pages, checkout flows, account areas, multi-market delivery
catering24.co.uk — Custom storefront with advanced integrations and full frontend delivery
solar.com.pl — CMS-driven storefront with custom UI components and features

Mar 2024 - May 2024 Front-End Developer, 3MK Protection

Remote

3MK Protection — Built an e-commerce platform from scratch, delivered core customer-facing flows, developed custom UI components with focus on UX and conversion, collaborated with a cross-functional team.

Jan 2020 - Apr 2020Frontend Developer, ORBALublin

Worked as a front-end developer on an e-commerce website for the cosmetics industry, specializing in Magento 2. Focused on using key Magento 2 capabilities to improve site performance and user experience.

Education

Oct 2014 - Mar 2018Engineer of Computer Science, University of Economics and Innovation in Lublin

Skills

React.JS	Expert	Magento 2	Expert
TypeScript	Expert	Tailwind	Expert
Styled-components	Expert	HTML/CSS	Expert
Gatsby.js	Experienced	Next.js	Experienced
Hyvä	Experienced	JavaScript	Expert
JQuery	Expert	AJAX	Expert
REST API	Experienced	Storybook	Beginner
GraphQL	Experienced	Less/Sass	Expert
Git/GitHub/Gitlab/Bitbucket	Expert	JIRA/Clickup/Trello/Azure devops	Experienced
Responsive Design	Expert	Leadership	Experienced
Web Optimization	Expert	Git/GitHub	Expert
Claude.ai	Expert	Chat GPT	Expert
Cursor AI agent	Expert		

Languages

Polish	Fluent	English	Fluent
Ukrainian	Native Speaker	Russian	Native Speaker

Courses

Sep 2025	Cursor & Claude Code Professional AI Setup	Cursor, Frontendmasters
Jan 2024	Next.js From Scratch 2024	
May 2020	React Hooks - Building Real Project From Scratch	
Apr 2020	Understanding TypeScript	
Sep 2019	ReactJS from Scratch to Pro, webformyself	

AI & AGENTIC DEVELOPMENT

2024

AI-Assisted Software Development (Agentic Workflows)

- Daily use of AI agents in software development workflows
- Specification-driven development with LLM support
- Task decomposition, implementation planning, and architectural reasoning
- AI-assisted code generation, refactoring, and validation
- Prompt design and iterative prompt refinement
- Designing repeatable workflows where AI accelerates delivery while engineering decisions, architecture, and production quality remain human-owned
